

Reviving The American Dream

3 Essential Steps to Winning Back Our Country Before It's Too Late

An Urgent call for ALL Americans to RISE UP and Fight While we Still Can

My Fellow American,

I'm writing this Book to you with a heavy heart... You see, things have gotten out of hand and we can't sit around and watch as our salaries and savings get burnt to the ground...

...our jobs disappear, the stock market crashes, we lose our freedoms and worse.

We have no choice: act now or suffer at the hands of tyranny later!

I've written this book in an easy-to-read fashion...

So please focus your attention on what you are about to read, making your eyes captive to every word on this page...

...as you will discover how we can get out of this hole before it's too late.

Though, in order for all of this to make sense... There is a short story that I need to share with you.

Something that, when read, will help put everything else into perspective - including the solution to our nation's problem.

I debated back and forth a bit before deciding to include this story... as it can get a bit embarrassing for me at times...

...so glue your eyes to these pages (or listen attentively if on audio) and let's start by taking a look at:

The good ‘ol days

I remember when I was a child growing up in the 80s and 90s... the freedom of being able to hang out anywhere around the city... without having to worry about the dangers lurking around...

...being able to leave the door unlocked when leaving KNOWING that our neighbors always had our back.

You see:

Back in those days my dad was the “breadwinner” of the house and my mom had the choice and freedom to work or stay at home and homeschool us.

She chose the noble job of homeschooling... and I tell you, there is a special place in heaven for that woman having to raise me - I was a handful!

I always joke and say that God gave me a double dose of energy when he knit me together in my mother’s womb!

We easily had healthcare in reach, dental...

...there was plenty of money to go around...

Housing was prevalent and accessible and food was cheap and plentiful! And so were jobs...

Oh and did I mention the low price of gas?

Those were the days...

Things weren’t perfect, but man we had it good.

I remember sitting down and listening to my father (a boomer) talk

about how much better things were when he was a kid!

A brand new house would cost you \$9,999 (about \$100,000 adjusted for inflation)... and in my perception, it sounded as if almost everything cost a nickel back then...

At the time, I would have never imagined looking back on life at almost 40... and now remembering the “good ‘ol days” of my childhood and adolescence.

You know, when a dozen donuts was \$2.99... a gallon of gas \$1.07... Houses to rent and buy just hanging on trees (at least in my area).

Which reminds of:

My first time joining the job market

When I was 15 years old, I decided that I was going to make my own keep per se...

...So I went up to the local McDonalds that was opening and applied for a job.. Woo hee! First try for a job and I got it!

It was a blast... you know, a bunch of teenagers working the registers, grill and drive-through window... having a good time.

...OH and what a thrill whenever I got to do Birthday Party Duty on Saturdays (Though not so much when I had to wipe the greasy fingerprints off from all over the inside of the big old jungle gym lol).

Moving up in the world

It didn't take long and much more than a big smile and good work ethic to move up in the world...

... By the time I was 20, I had already made it to one of those big

box home improvement stores and was working as a sales specialist...

...making a great livable income with no College education at 20!
(Had healthcare and everything too) I drove around a semi-new BMW 5 series, lived in a nice place...

...Had plenty of money to save and spend, constantly went out and so on.

Though, I wanted to explore and see some of the world:

Moving out into the world

In 2004 I decided I was going to volunteer with a non-profit Christian organization and just spend some time serving... I got to live in Puerto Rico for a while (picked up Spanish) ...

...came home and decided that I was going to work a bit more and head to a new country!

So I buckled down for about a year, got a job right away...

...and saved up to go to BRAZIL!

Meeting my Danish wife in the middle of Brazil

I spent about a year there volunteering again through a Christian organization... picked up Portuguese...

...And one day this young sweet Danish girl shows up!

And guess what?

I got to be her official translator (good for me hehe)!

So it really didn't take long for her to fall for me... as I am so

charming and... OK truth be told... I went after her pretty hard.

While in Brazil I remember my brother who at the time worked as a loan officer, told me to buy a house...

All I needed was \$2,000 down to buy a \$250,000 house (UM... Come again?) and within 12 months it would be built... It would appreciate \$30-50,000...

Fortunately I didn't... and I'm sure you may have guessed why... but will cover it in a minute.

Anyways. My Danish fiancé and I decided to get married and move to the states!

Getting married

Getting back to the states, in Maricopa Arizona, I got a job right away as there was a wedding to save for.

One thing I noticed RIGHT AWAY is that there were "all of the sudden" 24 hour liquidation auctions for the houses all around us... (we stayed in one of the new bedroom communities in Arizona)...

And my first thought was: *WOW what a good deal!*

Not knowing that these were the first warning signs for an unparalleled crisis that started in America and ended up shaking the world...

And so... we then got married in December 2006 under BEAUTIFUL open skies in Maricopa Arizona...

It was amazing! I even sang a song I wrote for her and all that good fashioned sappy stuff... (and no, sorry, not going to sing it for you all haha).

Unfortunately though:

Things started turning

my wife got pregnant and really wanted to give birth close to her family in Denmark...

...And I happily obliged! So, we moved to Denmark and literally, right after...

This is when the housing crisis began... default after default of toxic mortgages...

...1 by 1, our friends and families began to go backwards in their mortgages and lose everything!

Their entire life savings and more... houses that were worth \$450,000 TANKED to around \$120,000 (it was obviously worse in the new house areas of Arizona) ...

Then the economy collapsed

Investment firms and banks went under...

...and what does our government do?

They financially BAIL OUT the very people who got us into the situation!

It was later found out that after these companies were bailed out by the government... they used a lot of the money to give themselves FAT bonuses...

Sickening...

And it didn't stop there...

America Was changed: For the worse

Companies began to automate more and more... The days of being greeted with a smile at a cash register in McDonalds were over... You had to order on a screen... DANG.

30 somethings were having to get lower paid retail jobs and compete with the younger generations...

..making it harder for the young to get a part time job.

Our country had been shaken... the extreme rich had managed to get MUCH richer...

Meanwhile the middle class started to dry up.

More and more people had to move in together to make ends meet...

Things Got better

Things did eventually get better... Though, never to the level they were pre-2007-2008 housing crash...

Jobs became more available... The economy grew and expanded.

Production was high and life was starting to look a bit better!

And then Covid hit...

This is where things REALLY start to heat up. So, stay with me here!

Lockdowns, restrictions... FEAR... death and more...

Nothing good about the so-called "China Disease" ... some believe that it was a weaponized virus used for domination (oddly enough... China bought up LOADS of assets world-wide during this time) ... but let's not get into that right now!

And then we hear some good news! Stimulus payments!

The Rounds of Stimulus Payments

I remember like it was yesterday... a check shows up in my mailbox with a BOATLOAD of money entitled to me with a note from President Trump...

Free money? WHAT!?! My inner skeptic came to light... As my dad used to say, there is NO SUCH THING as a free lunch!

Anyway... this and all of the memorandums to delay payment of rent and mortgages... provoked a buying spree.

In Came Biden and then the floodgates of stimulus payments came!

Our Economy was BOOMING!

I will never forget going to the local electronic store to look for some games for my kids...

...EMPTY almost all the shelves were EMPTY!

I then started looking stuff up online... almost everything was sold out... and things that weren't cost 30-40% more than usual.

WOAH! I thought to myself, something is really fishy here... right?

How can a country that has VERY LOW PRODUCTION (due to covid), loss of jobs, lockdowns etc. have a booming economy?

The math didn't add up!

The Cat Out of the Bag

I then began to do some research...

...and I found the dirt:

It is led to believe that the Government had printed up to 13 TRILLION new Dollars under COVID (most of it in secret)!

Let me just write that out for a second so it can sink in:

\$13,000,000,000,000

Let's just put that into a bit of perspective...

The U.S. Government spent a total of just over 2 trillion Dollars on the 20 YEAR WAR in Afghanistan...

...4 TRILLION on WW2 from 1939-1945 (adjusted for inflation) ...

...As a matter of fact... the U.S. Treasury printed MORE MONEY in 1.5 years of COVID than *ALL OF THE WARS COMBINED!*

Yep... you heard me right. All that because the Government decided to implement a dictatorial reign to chase a virus around?

No... no freaking way!

Something was rotten and I had to find out what

Things still didn't add up... if you print up to 13 TRILLION dollars... there has to be a money trail!

IF they divided all that money between the 258 million adults in America... we would have gotten about 50 THOUSAND DOLLARS each...

Still with me so far? GOOD!

Well, about 3 TRILLION of it went to households and businesses (including airlines) ... and the rest of it?

NO ONE REALLY KNOWS (They just called it “Quantitative Easing and Infrastructure”).

Though if you and I didn’t see any of it... then most likely it flew freely to the ultra-rich... and dare I say: China.

And let me be clear about this... you can’t just print that much money without having CATASTROPHIC consequences.

YOU and I will be footing the bill for this... through the prices of Milk, Bread, Cereal... well EVERYTHING.

They Killed the Economy and Propped it Up

The Legislative and Executive branches of the Government are out of control (which is the Congress, President, VP etc.)... Making decisions in cahoots without involving the American People who they SWORE to represent.

And yes, this applies to BOTH sides of the political spectrum!

Here you have a bunch of career politicians that have no friggin clue about how things REALLY work...

...making INSANE economic decisions without consulting experts...

And the result?

They KILLED THE ECONOMY during COVID (production essentially stopped).. And printed these massive amounts of money to give a false illusion of “business booming” and growth...

PUMPED tons of money into all sorts of secretive projects... That you and I have NO IDEA about...

And claim that there is nothing to see when you are paying out the nose for groceries, housing, cars, gas and so on...

There is an old saying (excuse my French here): if it smells like a turd, looks like a turd and feels like a turd... well, then it is probably a turd!

OH and a Proxy War was Started too!

Coincidentally enough... when things started coming to the light about ineffectiveness of measures... bad decisions... vaccines etc. (Mind you, I do acknowledge that COVID exists and is real, I have had it myself. The decisions taken about to handle it could have been much much better) ...

It is THEN that you and I start realizing the downfall of what happened...

Although... ALL OF THE SUDDEN: **HUGE CENSORSHIP** and a war breaks out in Ukraine.

NO... let me reiterate...

A PERFECTLY STOPPABLE war happens in UKRAINE!

The current administration sits around as Ukraine is surrounded on all sides... does nothing... and gets attacked.

And guess what?

It becomes our next “indirect” war (known as a proxy war)... where we are essentially waging war against Russia...

...RISKING a Nuclearized WW3 in the process - I mean - I’m not the complaining type but COME ON!!!!

And guess what? We get to foot the bill... So far to the tune of **\$8,000,000,000 and counting...**

...my heart goes out to everyone being harmed with the bloodshed...
But it stinks to high heaven of yet another SMOKE AND MIRROR
show to hide a true agenda....

Especially when you discover the 1-world agenda behind Ukraine
the last many years.

It was supposed to be the poster boy of the west's "unification"
(more so, us giving up our freedom and liberty).

Maybe we can get into that another time...

And so:

The Perfect CATASTROPHIC Storm Was Created

Extreme scarcity of products due to low production during COV-
ID... the war in Ukraine restricting food, gas and oil worldwide...

...MASSIVE money printing. An insane housing market... the
threat of World War 3 on the horizon...

And more have created the most dangerous and explosive cocktail in
the history of the World.

In 2007-2008 the housing crisis was horrible... Though, it started
with toxic subprime housing loans...

HERE:

We are talking about a housing crisis, stock market crisis, food short-
ages, gas crisis, job crisis, war...
...and more.

I don't say this to scare you, please understand that. I say this so we
can work together to find a solution.

The time to take action is now...

...the storm is on the horizon and EVERYONE can see it coming.

We have about 1-1.5 years according to my sources to do something about it (if not less).

We HAVE TO WIN in November!

There are 3 steps we can take to save our country...

... though before looking at these 3 steps. It is extremely important to understand how the Government is supposed to be working for you:

A Government by the People and For the People

Our Government was created at a time when we were faced with some of the worst tyranny in history...

...you see, at the time of the first 13 colonies the oppression was horrible.

We are talking INSANE taxes to the King of England... the English military could take any house they wanted for their own use...

...systematic oppression, corruption and NO say in any of the laws or rules that were made.

And so:

The colonists tried to work their problems out with the English... the original intent wasn't to break with the King of England.

They tried to work things out, though the more tyrannical and oppressive the King became: Influential people became silenced left and right.

So the colonists drafted the *Declaration of Independence*:

Declaring our independence from the English stating that we have a GOD-GIVEN right to *life, liberty and the pursuit of happiness* amongst other things...

...the Constitution was drafted with this in mind... full of checks and balances to keep us from falling into the hands of tyranny again.

It aligned our values as a Government with those of Christianity as our absolutes, though respecting and permitting anyone who didn't believe.

And so what they did was:

Essentially divide our Government into 3 branches:

You have the *Legislative* (Congress/Senate) who draft laws etc., the *Executive* (President, VP, Speaker etc.) who approve the laws or veto them and the *Judicial* (Supreme Court) who verify that everything follows the constitution...

These checks and balances between each branch are supposed to keep things aligned with our constitution.

It was the world's first test in democracy following the Biblically inspired values that say, WE the PEOPLE are the KINGS AND QUEENS... just like the Bible says:

But you are a chosen people, a royal priesthood, a holy nation, God's special possession, that you may declare the praises of him who called you out of darkness into his wonderful light." (Taken from 1. Peter 2:8)

And as a side note: I completely respect your decision and constitutional right if you aren't a believer in Christianity, though it is extremely important to understand that our country's foundational

values are in fact Judeo Christian.

And it gives us our moral absolutes and compass to follow:

Back to being Kings and Queens... Part of our responsibility of being Kings and Queens is that we get to choose who represents us...

...and who is our voice within the Government...

This is such an amazing privilege that no other country endows on its citizens.

And why it's so important to vote! (Hint hint!)

ANY man or woman can be elected into office and represent the people... unlike other countries.

The Idea Behind the World's First Test of Democracy

Is that politics shouldn't be something just for the wealthy, highly educated and well connected...

... it was designed with US in mind. That a plumber could run for office or a business man (my case) can represent his country and make a difference...

... A school teacher can rise up and run for office.

ANYONE can. This is how we can be assured that our country isn't run by a ruling elite or career politicians... rather it is ran by US for US.

It is a beautiful notion and such an amazing gift that our forefathers gave us...

By doing this, they allowed us to make sure that things are as WE want them to be.

I can almost read your thoughts right now...

“Wait a minute Kevin... why isn’t it like that now?”

I’m glad you asked!

What’s Broken within Our Government

During the last half century or so... the United States has begun to turn back towards the tyranny we ran from.

Why?

Because it has turned into a place for career politicians... where the only people who can win office HAVE to be associated with either the Republican or Democratic parties... based on seniority.

And we all know how that goes... it’s like “East Coast vs West Coast” gang wars every 2-4 years...

1 party does everything they can to seize power... to then flip it during the elections...

And the tricks are only getting dirtier and worse - from both sides!

We could spend hours talking about even the most recent of events.

In most states, the voting system has been corrupted allowing it to be gamed and manipulated (this is proven)...

And so... now we have 1 party in office that is doing everything they can to get dominance, control and push their agenda...

All the while... WE THE PEOPLE are slipping through the cracks... and suffering with their mostly RIDICULOUS decisions!

It stinks... and we know it.

Something has to change.

So what needs to happen to fix this?

We Need to Look at Our Democracy Like A Solid Apple Tree

You may have heard me say this before (I love this metaphor):

Our democracy is like a solid well-grown apple tree.

The bigger the tree the deeper the roots go down to plant it firm...

...The solid roots represent the *democracy* we are founded in... and they are planted in the blood and sacrifice that our forefathers valiantly have given us.

The nutrients from the roots flow through the trunk which represents what we have BUILT on top of our wonderful democracy...

And the branches/leaves represent the effect of the implementation of our democracy... this is where you can pick the juiciest and most beautiful apples...

And the bigger the tree, the more apples it produces so everyone can enjoy them.

What if the roots are rotten?

So, if at the roots of the tree there are divergences with our founding democratic principles...

Like Federally supported abortions, which violates the Judeo-Christian Values of our country.

...it creates BAD roots. If you have some bad roots... it doesn't

mean that the tree will fall... It means that the nutrients stop following through the trunk as they should...

...and where you will see it, is in the branches and more importantly the FRUIT.

Maybe you have seen it before: a big, beautiful tree where it seems that a portion of the branches are barren and without any leaves...

... it's like part of the tree is dead... yet it is still standing.

This is directly a result of ROT in the roots... and if the rot spreads, before too long, the tree will fall... It's only a matter of time.

So how can we fix this before the rot spreads and we lose our beautiful tree?

Step 1: We Need to Align our Democracy

On the 4th of July 1776 the 13 colonies essentially nailed the Declaration of Independence to the tyrannical King of England's front door...

...Declaring that we ALL have a right to life, liberty and the pursuit of happiness endowed by our Creator.

10 years later, the Constitution of our country was then written... outlying the framework that would guarantee our rights as Americans.

It was a beautiful first attempt at democracy in the world... and it was a success!

And Finally and more commonly known, the amendment to the constitution to spell out OUR FREEDOMS: the amazing Bill of Rights (think: freedom of speech, right to bear arms etc)...

The amazing thing about the Bill of Rights is that it was designed to PROTECT us against Government Overreach! Seriously.

Everything the Federal Government decides, should be done based on these founding principles. And if it doesn't... it is OUR DUTY as a nation to hold the Government ACCOUNTABLE.

You see, these 3 documents give us the framework to guide the country based on a Christian framework...

It keeps us ALIGNED to absolutes!

Example:

- *Do not kill*: there would be no legal abortion
- *God created Man and Woman*: there would be no more gender confusion agenda.

And my favorite of all.

- *Do not steal*: this will keep the Government out of your pockets!
- HA! (Sorry... I couldn't resist...)

What happens when we become misaligned?

Well, let's take a look at one of the amendments of the Constitution of the USA to get an idea of what I mean.

Amendment 2 the right to bear arms: "*A well-regulated Militia, being necessary to the security of a free State, the right of the people to keep and bear Arms, shall not be infringed.*"

In other words, we have the right to protect ourselves and those we love, and in many interpretations, form Militia to protect us against Tyranny if needed.

So, what happens if this liberty is obstructed or taken away?

We completely lose our power and freedoms...

I'll give you an example: For many years I have lived in my beautiful wife's country Denmark up in north Europe.

Denmark is constantly touted as the Scandinavian poster child of a socialistic democracy...

...how they have the world's happiest people etc.

Hogwash! I love the people of Denmark; many are good life-long friends... though let me tell you...

They are a CONTROLLED people!

I'm talking up to 60% income tax... 180% car tax (How about a HOT DEAL: Buy three cars and get 1!?), 25% sales tax... 2-3x the gas prices compared with the states... All to feed the Government MACHINE.

...You have very few freedoms. Their whole society is birthed out of Kingdom style Oppression. There was no revolution and revolt against monarchy like in the States.

In Denmark, if an armed thief breaks into your house in the middle of the night... your only option is to call the police.

If you for some reason decide to protect your property and the thief gets hurt... YOU could be put in jail and have to pay damages and fines to the thief!

No joke.

I have a friend that was well known in Denmark and now lives in Clermont, Florida. In Denmark he was subjected to people breaking into his house, people doing sick acts in front of his window (in front of his kids), constant threats etc... and he couldn't do anything about it...

...In the states, he is able to protect himself and as he says “Kevin, some days I wake up and just cry... I’m so happy to live in America!”.

This is the beauty that we need to maintain.

What Happens When We Become Aligned?

When we are aligned with our founding values under the umbrella of Christian absolutes...

Things just work!

In other words: *When we work together in harmony in the same direction.*

We are like a ship that is able to sail with precise coordinates with everyone working together towards the same goal.

What happens when the captain decides that he identifies as a cook and the deck-hand as a captain?

Nothing good... I can tell you that much. That ship is going to sink!

The Government’s Job is to Keep Alignment

Our government is meant to represent us and our best interests. It is in place to guarantee that we have life, liberty and the pursuit of happiness.

Alignment equals harmony. When you have a government that is well aligned with our best interests, we thrive as a nation.

For many years, 90% of the world’s innovation (not a typo!) came from the USA... That’s an insane and amazing number!

Why?

Because freedom to innovate and create was a protected treasure... anyone who's anyone, wanted to get to the states as it was the land of opportunity.

Heck, my ancestors immigrated from complete poverty in Sweden a century ago and started Greyhound Buslines! They lived the American dream.

Although, as more and more misalignment has been creeping into our government like cancer...and growing fast, we are falling behind daily as countries like China are thriving.

Why? Because the Government began to oppress our freedoms instead of being aligned with them.

Everything the Federal Government decides, should be done based on the founding principles. And if it doesn't, it is OUR DUTY as a nation to hold the Government ACCOUNTABLE.

Making sure that what is done at the ROOTS of our democracy is aligned with our founding principles... Otherwise, it will be rotten.

Step 2: We Need to Apply our Democracy Correctly

This is where the 3 branches of Government step in and APPLY our democracy... Where the ROOTS flow into the TRUNK of the tree... allowing it to grow higher and higher.

This includes: Drafting new laws (Legislative: think Congress), carrying out the new laws (think President, VP etc.) and evaluating new laws (Think Supreme court) ...
...Let's take a look and see how this works.

Let's say that Congress (the legislative) drafts a bill they want to become law called "Take away America's guns"...

...Then for some crazy reason, it is approved and sent to the Presi-

dent (the executive) to be signed into law.

We then have the chance for the president to DENY signing it into law... or agree.

Let's say he agrees and it becomes law. This is where the SUPREME COURT (the Judicial) can step in and say *"HEY! This violated the 2nd amendment and we strike it down..."*

This is where it gets interesting... This very type of thing is happening RIGHT NOW!

Parts of our legislative branch and executive branch are ROTTEN.

This is where 13,000,000,000 DOLLARS were "magically" created in about a year and a half...

...and all they had to do was throw a coin or two to us every time they passed a new stimulus package and we thought it was for us!

This is why we are NOW in a proxy war with RUSSIA via Ukraine spending BILLIONS to help secure Ukraine's borders...

...meanwhile the current administration has allowed OVER 2 MILLION illegals over the border...

...without any background checks in any way (*while at the same time taking 3 years for my Danish wife of 15 years, mother of 4 children to get a Green Card the legal way!*).

This is where the CHECKS AND BALANCES our forefathers created are supposed to step in and prevent this kind of thing...

Though unfortunately due to the corruption, power circles and problems at the top... it's simply not.

The solution? Well... quite simply:

start voting for people who are honest and who you believe will uphold our democracy and FIGHT FOR YOU! (Hint hint)

Step 3: We Need to Reap from Our Democracy

Once we have the SOLID roots of democracy in place... a THICK and STURDY Trunk allowing the laws of this land to FREELY FLOW the way they should...

...we reach the final and most important step.

The Branches that bear the FRUIT so we can freely pick from them!

This is where the laws of the land are then applied and put into effect so that we as citizens and residents of the U.S.A. can taste and enjoy the American Dream we have built together.

This is where the Federal Government should:

- Make sure YOUR money is spent right by offering relevant benefits *(instead of offering to pay for gender operations...)*
- Guarantee that your freedom of speech is protected *(instead of the current wave of censorship via social media, news outlets etc.).*
- Make sure that you have access to GOOD and AFFORDABLE healthcare *(instead of having the highest health care costs BY FAR in the world!)*
- Fight domestic terror and crime *(instead of DEFUNDING those that protect us)*
- Give benefits and treat those who have FOUGHT FOR OR FREEDOM as they should *(instead of diverting money to wars that aren't ours AND giving BILLIONS of dollars of equipment to our enemies).*
- UPHOLD our country's Christian values as the absolute right and wrong while allowing anyone to believe as they wish *(instead of confusing our children, the future of our country about who they were created to be).*
- Stimulate our small business, innovation, international trade and the economy in general *(instead of printing money, going on extreme*

spending sprees.... causing inflation and footing us the bill!)

- And so so much more.

This also applies to families... Why are we the only country in the world that doesn't bless our mothers with paid maternity leave?

If you take funds away from misaligned Government ventures, you could easily redirect them to funding mothers... heck, you could even allow the companies they work for to be reimbursed up to a certain amount so that they can keep their jobs too!

And while we are at it, let's take the per child value the Federal Government allows for education (about \$2,000 per year) and allow the MONEY to follow the child wherever he goes to school...

...daycare OR even homeschool! (BTW: I intend to get the Federal Government to increase the investment per child).

This will create a DEMOCRATIC schooling environment for your child.

It shouldn't be a punishment to want to start and have a family.

What Happens If We Don't Take Action

I'm sorry to say that the clock is ticking and time is running out... we have a toxic cocktail of bad decisions that are catapulting us towards the worst crisis we will ever face as a country.

I really believe that we are headed towards a crisis that could outshine the Great Depression... an unfortunate time where a great majority of Americans lost everything... Houses, jobs, cars and more...

A time where people had to line up in soup kitchens to get any food (if they could)... where many kids couldn't even go to school.

Do we want our future generations to live in a possible scenario that could be worse than this?

I don't.

It's Time to Take Action

Before it's too late... And I don't say this lightly...

...The country's current political situation has led me to close all of my business and serve my country in politics.

I've been down in the trenches and seen what it's like to be a business owner, father and husband...

...and really can't sit back and watch anymore while our American Dream is quickly being destroyed.

America is one of the few (if not only) countries in the world where anyone can take a stand and make a change in politics.

I'm making this stand... Will you join me?

How I Will Fight for You

When you cast your vote for me, I can guarantee you that I will do more than my "job description" states...

...I am the type of person that when you get me in a room with highly influential people, I will influence them.

Giving me a voice in the Government gives you a lasting change in the right direction...

Meaning:

1) We Must Have a Good Economy

- We Need to Get Inflation Under Control (*The biggest indirect tax increase in U.S. History*).
- Bring Innovation and Jobs back to the States (*We are pouring our country's money into country's abroad instead of stimulating our own economy*).
- Stop insane Government spending (*over 13 TRILLION dollars have been printed under Covid... this needs to STOP!*)
- Support small businesses (*Make it easy and more attractive to start and run a business*).

2) We Must Have Access to Good Healthcare

- Breakup the Healthcare Mafia (*keeping the inner-circles from driving the prices up*).
- Open up Healthcare to Free-market Competition (*so competition brings prices down and you gain transparency*)
- Guarantee GOOD Private Coverage for Everyone who wishes (*if you want healthcare, you should be able to get healthcare*)

3) We Must Be Protected Domestically and Internationally

- Optimize our Military Spending (*Focusing our spending on building our army STRONGER and BETTER*)
- Increase benefits for active and retired defense branches (*You serve or served and protected our country domestically or abroad, it is OUR DUTY to serve you!*)
- Protect our constitutional rights (*Protect our freedom of speech, assembly, right to arms and more*)

4) We Must Take Care of Our Families:

- Women should have the right to paid maternity leave (*All women should have the right to 6 and up to 12 months of paid leave to focus on their babies*)
- The Burden on Families should be lighter (*More Government funds for family-focused programs*)
- Childcare should be more accessible (*More Government help to childcare*)
- Federal school funding should be increased (*currently only about 7.9% a measly \$1,900 per child*) AND the money should follow the

child based on what school he/she goes to.

5) We Must End Government Overreach:

- End the Government Gender Confusion Agenda (Our kids are under attack and if we don't change this, they will suffer).
- Push back the Federal Government's reach (Less Government control and more empowering of the people).
- Align our Government with our Christian Fundamental values (Without moral absolutes in our Government, our nation will be confused and lost).

And much more.

Here is What You Can Do

First for those that live in Florida Congressional District 11 and Secondly for all others:

If you find yourself located within Congressional District 11 Florida (just west of Orlando around the cities of: *Ocoee, Apopka, Bay Lake, Polk City, Clermont, Minneola, Mascotte, Tavares, Leesburg, The Villages, Fruitland Park, Wildwood, Coleman, Lake Panasoffkee, Bushnell, Webster, Center Hill*)...

...Then make sure you get out and vote by November 8th, 2022 (Early Voting starts the 29th of October and runs until the 5th of November) in the Midterm Elections.

You will find my name "Kevin Porter" located under the candidate for U.S. House of Representatives (Congress)...

...I am running as an independent (on purpose).

Make sure to check that box so we can make this happen!

Secondly for everyone in our outside of District 11:

You Can Also Donate to the Cause

I really would love to count on your support to make this happen!
(And any future political endeavors if you read this after the elections!).

All donations are used in a very strategic, effective and wise way...
this is due to my many years of successful experience in running my
own businesses...

... I will turn your donations into campaign success, and WE WILL
WIN!

Any US Citizen can donate by going to www.kevin4congress.com -
so head over there now: Kevin (the number 4) congress dot com.

Final Words

I just want to thank you so much for taking precious time out to read this book and my hope and prayer is that it will have educated you, motivated you and stimulated you to take action for our country...

... so that we can go back to Roots Democracy and win back our freedom.

I'm counting on you to join me in 1 voice.

Don't forget to interact with me on social media, you can find the links to my various social media platforms on kevin4congress.com.

I'm looking forward to talking with you!

God Bless You, Your Loved Ones and Our Beautiful Country!

A handwritten signature in blue ink, appearing to read 'Kevin Porter', with a stylized flourish at the end.

Kevin Porter

Candidate for the U.S. House of Representatives, District 11 Florida.
